Project Title   - Efficient Water Quality Analysis and Prediction Using Machine Learning.

Problem Statement	I am	I'm trying to	But	Because	Which makes me feel
PS-1	Soft drink Industry Owner	Increase the quality of soft drink	It costs a considerable sum of money.	There is no effective way to keep track of the water quality.	Frustrated
PS-II	Healthy Individual	Avoid water related health issues	I am unaware of any harmful suspended water particles.	There is no effective way to keep track of the water quality.	Worried
PS-III	Farmer	Prevent the crop from water-borne disease.	I'm not familiar with water-borne plant disease.	There is no effective way to keep track of the water quality.	Afraid
